You may ask, "why is it important to vote"? or, "what is the impact of voting?" well I'm gonna tell you, it's important to vote because you want to make sure the right person is selected to be President or it could very much affect your future, you also want to make sure you're voting for someone who does best for your community and environment! you're most likely to vote for the person who believes what you believe, and who stands for the legal rights you stand for, and everyone over the age of eighteen is recommended to vote, now, the impact of voting makes you powerful, brave and confident because you have to vote for the person you think should run for president and you have to not care of what others say about who you're voting for, and why you're voting for them, oh, and voting very much delivers a message by telling you how important it is to vote and why, it's very funny how writing on one little piece of paper can possibly change your future! am I right?
