

Law Day 2023

Hollie Hollister
Lincoln Elementary

The reason why we need three Branch is because the three Branches would keep each other balanced so that one branch did not become too powerful it's called checks and balances.

This is what the Executive branch does it is the president and the vice president, declares states of a emergent and they enforces laws of the united state. This is what the Legislative branch does it makes laws, it controls money, it can make war and it can override the president. This is what the Judicial branch does it interprets laws, makes argument for prisoners, they make laws fair and they are the biggest government.
